Corsair's SCUF Gaming (Nasdaq:CRSR), proudly unveils its latest controller for mobile gaming, SCUF Nomad. This Made for iPhone® Bluetooth controller brings performance features and ergonomics that SCUF has refined with competitive gamers to a mobile controller. Leveraging SCUF's many years of design expertise and history of competitive excellence with console and PC gamers, Nomad is crafted to provide a premium mobile gaming experience in a compact design that can be taken anywhere. Leveraging SCUF's many years of design expertise and history of competitive excellence with console and PC gamers, Nomad is crafted to provide a premium mobile gaming experience in a compact design that can be taken anywhere. According to Jake Tenorio, Director of Product Marketing at SCUF Gaming, “Nomad’s contoured grips and full-size triggers are inspired by SCUF’s innovative paddle controllers, reimagined for mobile. Nomad is a controller designed to feel natural in your hands,” Tenorio said. “Many mobile controllers don’t prioritize comfort, which directly affects your gaming performance and how long you can play. SCUF’s design philosophy is an ergonomics first approach, which is something customers will notice immediately when they pick up the Nomad for the first time.”

Nomad’s full-sized thumbsticks offer precise accuracy and control, while anti-drift Hall effect components offer sustained performance. The placement of the thumbsticks is complemented by the placement of Nomad’s two rear paddles, a patented SCUF innovation that provides extra speed and control while helping alleviate hand strain. This design allows gamers to use the thumbsticks and rear paddles simultaneously, just like the pros, a big step forward for what SCUF believes is the right way to play on all platforms.

SCUF Nomad is accompanied by a free iOS companion app that does not require a paid subscription. The SCUF App allows users to easily access and play their favorite games, such as CoD: Mobile, Roblox, or NBA 2K. Quickly launch games from the App Store, Cloud Streaming services, and Remote Play apps that allow you to play games directly from your console or PC. Create controller profiles for your Nomad to adjust to trigger sensitivity, thumbstick responsiveness, and the remapping of any button. Assign profiles to games in your library and easily share them with friends. The SCUF app also streamlines the process of capturing and sharing gameplay highlights on mobile, enabling players to showcase their skills with ease.

“As gaming continues to evolve, SCUF remains committed to delivering cutting-edge solutions that empower gamers to elevate their performance and enjoyment across all platforms.” Tenorio said. “Mobile gaming is an exciting new category for SCUF, with gaming continuing its rapid convergence across mobile, console, and PC. With the launch of SCUF Nomad at a $99 MSRP, more gamers than ever can experience the benefits of a SCUF controller. The SCUF experience has officially gone mobile.”

Pricing, Compatibility, and Availability:

SCUF Nomad is available to preorder online from 5/30/24 starting at $99.99 and in select retailers this summer. Nomad is compatible with iOS 16+ and will be launching with only one color: Black, with more customization and colors to come.

About SCUF

SCUF Gaming is a leader in the competitive gaming industry by continuing to be an innovator. Founded for pros competing on the esports stages they brought game changing features like rear paddles, adjustable trigger, and an unheard-of level of customization right to the hands of the player. SCUF continues to expand their reach beyond pros, to content creators, and the competitive players at home. Headquartered just outside of Atlanta, SCUF proudly joined the Corsair family in 2019.
