

## Win Without Wires: CORSAIR Launches New DARK CORE RGB PRO Wireless Gaming Mouse

April 7, 2020

**FREMONT, CA, April 7th, 2020**—CORSAIR®, a world leader in high-performance gaming peripherals and enthusiast components, today announced the launch of the new DARK CORE RGB PRO and DARK CORE RGB PRO SE, its new premier wireless mice. Utilizing CORSAIR SLIPSTREAM WIRELESS, hyper-polling technology, and an 18,000 DPI optical sensor, these new mice offer bleeding-edge wireless mouse performance with both wired and wireless charging options.

The CORSAIR DARK CORE RGB PRO makes several key updates to the award-winning DARK CORE RGB, while retaining the same shape and comfort that has made it a fast-growing choice among gamers of all kinds. The DARK CORE RGB PRO now features the ability to connect in three different ways: sub-1ms SLIPSTREAM WIRELESS, low-latency Bluetooth®, or USB wired. The optical sensor has also been upgraded to a custom PixArt PAW3392 optimized for wireless, with extremely low power consumption and a native 18,000 DPI resolution customizable in 1 DPI steps. New hyper-polling technology from CORSAIR, debuting in the DARK CORE RGB PRO, ensures blazingly fast response times by communicating with a PC at up to 2,000Hz – twice the speed of standard gaming mice and able to deliver the full performance benefits of SLIPSTREAM WIRELESS, for better-than-wired latency.

The DARK CORE RGB PRO boasts nine zones of RGB lighting, the most ever for a CORSAIR mouse, including an eye-catching integrated light bar with four individually addressable LEDs. CORSAIR iCUE software harnesses both the performance and the customization of DARK CORE RGB PRO, with full RGB lighting customization and synchronization with other iCUE devices, as well as button remaps and advanced macro programming for the mouse's eight buttons.

The DARK CORE RGB PRO retains the comfortable contoured shape of its predecessor, including two interchangeable side grips, and charges via a reversible USB-C cable. The DARK CORE RGB PRO SE adds another level of charging technology with the inclusion of Qi wireless charging, for effortless use with Qi-compatible devices such as the CORSAIR MM1000 mouse pad. With up to 50 hours of battery life between recharges, durable Omron switches rated for 50 million clicks, and onboard storage to save up to three lighting and macro profiles, the DARK CORE RGB is the most advanced wireless gaming mouse that CORSAIR has ever produced.

### Availability, Warranty and Pricing

The CORSAIR DARK CORE RGB PRO and DARK CORE RGB PRO SE are available immediately from the CORSAIR webstore and the CORSAIR worldwide network of authorized retailers and distributors.

The DARK CORE RGB PRO and DARK CORE RGB PRO SE are backed by a two-year warranty, alongside the CORSAIR worldwide customer service and technical support network.

For up-to-date pricing of the DARK CORE RGB PRO and DARK CORE RGB PRO SE, please refer to the CORSAIR website or contact your local CORSAIR sales or PR representative.

## About CORSAIR

Founded in 1994, CORSAIR has grown from pioneering the high-performance DRAM market into one of the world's leading providers of high-performance gaming and streaming products. CORSAIR offers a complete range of products to equip gamers, enthusiasts, and esports athletes, including mechanical keyboards, precision gaming mice, wireless headsets, premium PC components, and the CORSAIR ONE fully-integrated gaming PC. With a company-wide commitment to quality, innovative design, advanced features and high-performance, CORSAIR products have won thousands of media and industry awards, earning their place in gamers' hands and PCs following years of development and engineering by a team dedicated to building great products that they themselves would want to use.

In 2018 CORSAIR acquired Elgato Gaming, a manufacturer of streaming products. In 2019 CORSAIR acquired Origin Computers, a manufacturer of custom high-performance gaming PCs and laptops, and SCUF Gaming, an innovator and creator of high-performance gaming controllers.
