

CORSAIR Updates Headset Lineup with New VOID ELITE and HS PRO Headsets

October 10, 2019

FREMONT, CA, October 10th, 2019 —CORSAIR®, a world leader in PC gaming peripherals and enthusiast components, today announced the new VOID ELITE and HS PRO series of gaming headsets, updating the celebrated VOID and HS Series with improved audio, microphones, and comfort.

Whether you're looking for immersive 7.1 surround sound, multi-platform compatibility, low-latency wireless, dynamic RGB lighting, or any combination thereof, you'll find it in one of the many new CORSAIR headsets now available.

The CORSAIR VOID family of gaming headsets has become synonymous with quality gaming audio, lasting comfort, and superb build quality, and the new VOID ELITE series continues this with a range of updates. New custom-tuned 50mm neodymium audio drivers with an expanded frequency range of 20Hz-30,000Hz have been designed from the ground up to produce stunning clarity over a wider range alongside booming bass, while 7.1 surround sound puts you in the middle of the action with immersive virtual multi-channel audio.

Paired with a completely redesigned Discord-certified omnidirectional microphone for outstanding voice clarity and plush memory foam in the ear cups and headband for an exceptionally comfortable listening experience, VOID ELITE headsets combine the performance, quality, and features that gamers demand with iconic design that stands out from the crowd.

VOID ELITE headsets are available with several different connection types. VOID RGB ELITE WIRELESS connects to both PC and PS4 via ultra-fast 2.4GHz wireless with up to 40ft of range and 16 hours of battery life, offering both 7.1 surround sound and dynamic RGB lighting on the ear cups. VOID RGB ELITE USB also features 7.1 surround sound and RGB lighting, plugging directly into a USB port on your PC. VOID ELITE SURROUND is compatible with a wide variety of devices thanks to a universal 3.5mm connector, and includes a USB adapter unlocking 7.1 surround sound on PC.

Arriving alongside the VOID ELITE series, the HS50 PRO STEREO, HS60 PRO SURROUND, and HS70 PRO WIRELESS incorporate similar updates to push performance and comfort even further. Boasting superb sound quality thanks to all-new 50mm neodymium audio drivers and an updated detachable unidirectional microphone for clear and convenient voice communication, HS PRO headsets offer great audio whether you're listening to music, movies, or communicating with teammates in the heat of battle. HS PRO headsets also feature updated form-fitting memory foam padding on the ear cups for long-term comfort, as well as the premium build quality constructed with rigid aluminum alloy yokes and a metal internal headband that has made the HS Series a firm favorite among gamers.

The HS70 PRO WIRELESS employs a low-latency 2.4GHz connection with the same 40ft range and 16 hour battery life of VOID RGB ELITE WIRELESS, allowing you to play untethered whether from the desk, couch, or beyond with 7.1 surround sound. The HS60 PRO SURROUND features multi-platform compatibility with a universal gold-plated 3.5mm connection, a USB adapter enabling immersive multi-channel 7.1 audio on PC, and a durable braided cable. The HS50 PRO STEREO connects to nearly any platform with a universal 3.5mm connection.

Lastly, the all-new HS45 SURROUND is the latest addition to the HS family. The HS45 follows the multi-platform compatible HS35, retaining all of the same features such as a 3.5mm connection, durable lightweight construction, detachable unidirectional microphone, and adjustable ear cups with memory foam. The HS45 also adds 7.1 surround sound on PC via an included USB adapter.

Nearly every headset in the new lineup can be controlled through powerful CORSAIR iCUE software, enabling the use of five pre-tuned audio profiles, custom adjustments to equalizer settings, and 7.1 surround sound. iCUE also offers full customization of RGB lighting effects and colors on VOID RGB ELITE USB and VOID RGB ELITE WIRELESS.

With a huge range of options from the entire new lineup, anyone can find the perfect CORSAIR gaming headset and never miss a beat.
